* Based on commitments signed to projects, not including repayments or accrued interests

** Due to a lower demand for heat off take from the public authority, the Catfoss project has been scaled down in size with a reduction of the investment accordingly to €11.5m vs Q3/2019.

Advancing Sustainable Energy for Europe

Quarterly Fact Sheet as of 31/12/2019

NAV as of 31/12/2019 (in € million)

Impact Assessment

CO₂ savings (in tCO₂e)

Primary Energy Savings (MWh)

* Cumulative data includes calculations from financial close to loan maturity, based on estimations for projects under construction and less than one year of operations and actual data for projects which have been in operation for over one year. Savings are for total project investment volume (i. e. eeef and non-eeef investments). Portfolio Primary Energy Savings CUT & EE (absolute and percentage) is for 100 % energy efficiency (EE), clean urban transport (CUT) and additional capacity Renewable Energy projects only.

eeef created a number of videos to show the projects evolution,
please watch them on the eeef website <https://www.eeef.eu/home.html>

Project: Catfoss Renewable Energy 	Country: UK Sector: Renewable Energy Type of Investment: Senior Debt Total project size (€ m): 48 eeef investment size (€ m): 11.5 Financial close: 29.03.2019 Maturity: 29.08.2029 Status: Pre-construction
General description	
<p>The project consists of financing for a new combined heat and power (CHP) plant of a combined installed capacity of 28MW. The CHP plant will be constructed at the same site as an existing waste processing facility at Derwenthaugh Eco Parc, Gateshead, UK. The project will provide sustainable heat to a local district heating network as well as private heat and power connections. Once implemented, it is estimated that the project will realise 52,500 tonnes CO₂e savings per year compared to baseline. This is equivalent to 97 %. Furthermore, once the plant is in full operation, primary energy savings should exceed 315,000 MWh per year, the equivalent of 100% savings compared to baseline given the organic fuel currently is sent to landfill.</p>	
Recent developments	
<ul style="list-style-type: none"> Due to a lower demand for heat off take from the public authority, the Catfoss project has been scaled down in size with a reduction of the investment accordingly to €11.5m vs Q3/2019. Undergoing formalization of the project structure and associated documentation. 	
Project: Jewish Museum Berlin 	Country: Germany Sector: Energy Efficiency Type of Investment: Forfeiting Total project size (€ m): 1.4 eeef investment size (€ m): 1.0 Financial close: 20 March 2012 Maturity: 10 years Status: In operation
General description	
<p>Johnson Controls' Energy Service Company (ESCO) and the Jewish Museum Berlin entered into an amended Energy Performance Contract (EPC) for both buildings of the museum with a total EPC volume of € 1.4 m. Agreeing on energy efficiency measures comprising of the optimisation of heating, ventilation & air conditioning and an efficient energy management system, the project is expected to achieve a 26 % reduction of CO₂ emissions compared to the baseline. It is a lighthouse project because of its innovative financing structure using forfeiting as a funding source.</p>	
Recent developments	
<ul style="list-style-type: none"> Project performance in line with envisaged plan. 	
Project: University of Applied Sciences Munich 	Country: Germany Sector: Energy Efficiency Type of Investment: Forfeiting Total project size (€ m): 1.1 eeef investment size (€ m): 0.6 Financial close: 15 November 2012 Maturity: 10 years Status: In operation
General description	
<p>Johnson Controls' ESCO and the University of Applied Sciences Munich (UoM) entered into an energy performance contract (EPC) for both buildings of the UoM's campus in Munich-Pasing with a total EPC volume of € 1.1 m. The ESCO and UoM agreed on energy efficiency measures comprising the acquisition of a 49.5 kW combined heat and power (CHP) plant, the optimisation of heating, lighting, metering, building management and pumping. The implementation of all measures achieves a 6 % reduction of CO₂ emissions compared to the baseline. The ESCO guarantees the UoM certain energy savings p. a. and performs maintenance and building operation services for the 10 year contract period. This project is a role model for further energy efficiency investments in educational facilities such as schools, universities etc.</p>

Project: City of Orléans 	Country: France Sector: Renewable Energy Type of Investment: Junior Funds Total project size (€ m): 36.0 eeef investment size (€ m): 5.1 Financial close: 12 March 2013 Maturity: Perpetual Status: In operation
General description	
<p>The CHP plant with an installed capacity of 7.5 MW in electricity and 17 MW in thermal heat supplies the heat to the City of Orléans and sells the electricity via a Power Purchase Agreement (PPA) to Electricité de France (EDF) at a negotiated tariff fixed over 20 years. The plant is fired by wood biomass (90,000 tonnes p. a.) from a supply radius of less than 100 km. This project is the first equity investment of eeef (majority owner of the plant with 84 %). The operation of the CHP plant achieves a reduction of CO₂ emissions by 18,533 tonnes p. a., approx. 65 % compared to the baseline.</p>	
Recent developments	
<ul style="list-style-type: none"> • Project performance in line with envisaged plan. 	
Project: University Hospital S. Orsola Malpighi 	Country: Italy Sector: Energy Efficiency Type of Investment: Senior Debt Total project size (€ m): 41.0 eeef investment size (€ m): 32.0 Financial close: 8 May 2013 Maturity: 20 years Status: In operation
General description	
<p>The project entity, Progetto ISOM S. p. A., a special purpose vehicle (SPV) which is the counterparty of eeef, signed a concession agreement with the University Hospital S. Orsola Malpighi (UHSOM) in Bologna. Planned initiatives are intended to raise the energy efficiency of the entire fluid production and distribution system and reduce energy consumption via adoption of energy efficient equipment such as centrifugal chillers and absorbers, reconstruction of heat distribution networks, renovation of heat exchange substations and inclusion of a tri-generation plant for the combined production of cooling, heat and power (CCHP) sized on the basis of the energy consumption of the hospital facility which is fuelled by methane gas. The project will achieve a reduction of CO₂ emissions by 7,881 tonnes p. a., approx. 26 % compared to the baseline. It has been the largest energy efficiency upgrade in Italy under a public-private partnership (PPP) framework at the time of financial close and is a lighthouse project which demonstrates the positive impact of energy efficiency measures in public healthcare.</p>

Project: City of Rennes 	Country: France Sector: Renewable Energy Type of Investment: Junior Funds Total project size (€ m): 47.6 eeef investment size (€ m): 7.3 Financial close: 12 December 2013 Maturity: Perpetual Status: In operation
General description <p>The fund completed its second equity transaction, investing in Rennes Biomasse Energie, which operates a combined heat and power facility with an electrical output of 9.8 MW and thermal output of 22 MW over 20 years. This junior fund investment has been realised through the purchase of 85 % of the shares of Rennes Biomasse Energie by eeef. Dalkia France is co-investor along with eeef and is shareholder of the remaining 15 % of Rennes Biomasse Energie. The plant supplies 21,000 households in the city with green heat. The facility is estimated to save 13,258 tonnes of CO₂ per year.</p>	
Recent developments <ul style="list-style-type: none"> • Project performance in line with envisaged plan. 	
Project: City of Venlo 	Country: The Netherlands Sector: Energy Efficiency Type of Investment: Senior Debt Total project size (€ m): 8.6 eeef investment size (€ m): 8.5 Financial close: 3 April 2014 Maturity: 15 years Status: In operation
General description <p>The City of Venlo signed a long-term financing contract for € 8.5 m to finance street lighting upgrades with the objective of equipping a minimum of 16,000 lighting points with LED lights (73 % of the total lighting points of the city) and achieving more than 56 % energy savings. The existing public lighting is the largest consumer of electricity with approximately 36 % of total consumption of the municipality. The large-scale street lighting upgrade is a further sign of the city's commitment towards environmental sustainability including, among other things, being one of the first cities in the world to support the principle of 'Cradle to Cradle' (C2C), a framework for using sustainable energy resources only, phasing out conventional energy sources.</p>	
Recent developments <ul style="list-style-type: none"> • Project performance in line with envisaged plan. 	
Project: Universidad Politécnica de Madrid 	Country: Spain Sector: Energy Efficiency Type of Investment: Forfeiting Total project size (€ m): 2.5 eeef investment size (€ m): 2.5 Financial close: 18 November 2015 Maturity: 9 years Status: In operation
General description <p>eeef provided financing for the replacement of existing oil boilers supplying hot water and heating to the Universidad Politécnica de Madrid ("UPM"). The retrofit of new gas boilers, thermal valves and thermal PV solutions was completed in 32 buildings of the UPM. The project realised 22 % of Primary Energy Savings and 36 % CO₂e savings annually compared to baseline. The transaction resulted from the public tendering process launched by the UPM earlier this year. Ingeniería y Servicios de Eficiencia Energética S. L. ("Eneritika") was awarded with the nine year mandate, and the Energy Management Contract ("EMC") was signed on the 4th of September 2015. The EMC encompasses installing new technology as an upgrade to the existing infrastructure and perform operation and maintenance services as required to ensure optimal performance of the new technology.</p>	
Recent developments <ul style="list-style-type: none"> • Project performance in line with envisaged plan.

Project: Cardenden Heat & Power (CHAP) 	Country: United Kingdom Sector: Energy Efficiency, Renewable Energy Type of Investment: Senior Loan Total project size (€ m): 4.3 eeef investment size (€ m): 2.2 Financial close: 31 October 2016 Maturity: 16 years Status: In operation
General description	
<p>The project involves the replacement of gas boilers in residential buildings owned by Ore Valley Housing Association (OVHA) and small wind farms in the Fife Region in Scotland developed by CHAP. OVHA is a Scottish Housing Association, a registered social landlord with charitable status operating in central Fife, while CHAP is a subsidiary of OVHA. The boilers will be leased to OVHA and the wind plants will benefit of the national Feed in Tariff. The senior debt facility provided by eeef is complemented by junior funds from the Scotland's Renewable Energy Investment Fund (REIF) and equity from OVHA/CHAP. Overall, the project's target is to achieve cumulative annual savings of 99 % for primary energy and 96 % for CO₂e compared to baseline.</p>	
Recent developments	
<ul style="list-style-type: none"> • Project performance in line with envisaged plan. 	
Project: City of Santander 	Country: Spain Sector: Energy Efficiency Type of Investment: Forfaiting Loan Total project size (€ m): 9.2 eeef investment size (€ m): 9.2 Financial close: 18 August 2017 Maturity: 14 years Status: In operation
General description	
<p>The project consists of the upgrade of the existing street lighting luminaires from predominantly high pressure sodium vapour lamps to the last generation PHILIPS LEDs. In the 12 months construction period, ending in November 2017, the number of lighting points replaced are 22,300 units. A system of UVEX wireless sensors connects the whole infrastructure point-by-point with the City's digital communication network and the remote CEMILUX control system. Savings in CO₂ and primary energy are envisaged to reach 80 % compared to the baseline. The project emerges from the European Commission Technical Assistance, successfully completed in 2015, with the Municipality of Santander receiving €450k of funding to conduct energy audits, set up the street lighting investment programme and the tender documents. The project is one of the largest street lighting upgrades in Spain under a Public Private Partnership (PPP) framework.</p>	
Recent developments	
<ul style="list-style-type: none"> • The project achieved final commissioning and is fully operating. 	
Project: Wattosun 	Country: Portugal Sector: Renewable Energy Type of Investment: Junior funds (equity and shareholder loan) Total project size (€ m): 10 eeef investment size (€ m): 5.1 Financial close: 29 December 2017 Maturity: 15 years Status: Signed MoU, portfolio under construction
General description	
<p>The project consists of a portfolio of small-scale PV plants, allowing self-consumption up to 5.6 MW in total to end-users in the public sector across Portugal. Beneficiaries will be public entities such as municipalities, state-owned companies and other public authorities. The portfolio developer is Wattosun, an agile player with a highly skilled management team, which comes to a total of over 50 years of experience in developing, financing and operating rooftop and ground mounted PV plants globally.</p>	
<p>The portfolio, comprising seven sub-projects, foresees installation of circa 21,100 solar panels. When compared to the baseline and the Portuguese electricity grid, the project is expected to allow seven public authorities to save globally CO₂e emissions of 2,650 tonnes per year and primary energy savings of 20,736 MWh per year. The self-consumed electricity would enable the public authorities to minimise or even exclude any exposure to changes in energy prices and benefit from effective electricity cost reduction.</p>	
Recent developments	
<ul style="list-style-type: none"> • Signed MoU, the first portfolio project under discussion for funding.

Project: Illuminated Cities 	Country: Italy Sector: Energy Efficiency Type of Investment: Junior funds (equity and shareholder loan) Total project size (€ m): 20 eeef investment size (€ m): 16 Financial close: 27 September 2018 Maturity: 15 years Status: Portfolio ramp-up
General description	
<p>Illuminated Cities (Città Illuminate S.r.l.) is a Joint Venture between eeef and Siram by Veolia. The JV targets a portfolio of street lighting projects in Italy, benefitting mainly municipalities of small-mid size. Primary energy savings are expected by 56 % at a portfolio level and, for some projects, up to 78 % when compared to the baseline. The implemented measures are designed according to a full smart city approach, where lighting integrates multiple services, thus not limiting to the upgrade to LED technology but also including other applications such as remote control and management systems, video surveillance, wi-fi and charging stations for electric vehicles.</p>	
Recent developments	
<ul style="list-style-type: none"> The Rozzano project is progressing towards completion, expected by year end. The investors have injected the first tranche by total €4.4 m into the holding company Città Illuminate S.r.l., to support Rozzano and the other JV activities. 	
Project: CIMAC 	Country: Portugal Sector: Energy Efficiency Type of Investment: Forfeiting loan Total project size (€ m): 16.6 eeef investment size (€ m): 12.1 Financial close: 27 December 2018 Maturity: 12 years Status: Ready for installation
General description	
<p>The project consists of the upgrade of the existing street lighting luminaires from predominantly high pressure sodium vapour lamps to the latest generation LEDs. During the construction period, ending mid-2020, the number of lighting points replaced will come to a total of around 56,345 units. Savings in CO₂ and primary energy are envisaged to reach 74 % compared to the baseline. The project emerges from the European Commission Technical Assistance, successfully completed in 2017, with CIMAC receiving € 513,000 of funding to conduct energy audits, set up the street lighting investment programme and the tender documents. The project is one of the largest street lighting upgrades in Portugal where eeef has been instrumental in development and financing.</p>	
Recent developments	
<ul style="list-style-type: none"> First phase of renovation of the 13,600 luminaires was completed and certified by CIMAC. With this phase, over 50 % luminaires are renovated across the municipalities of Alandalor and Redondo while 30 % across the municipalities of Mourao and Estremoz. Subsequent phase of renovation works has been launched which envisages renovation of additional 4,600 luminaires. 	
Project: Smart H&U 	Country: Italy Sector: Energy Efficiency Type of Investment: Junior funds (equity and shareholder loan) Total project size (€ m): 22 eeef investment size (€ m): 7 Financial close: 21 December 2018 Maturity: 12 years Status: Portfolio ramp-up
General description	
<p>Smart Hospitals and Universities (SmartH&U) is a Joint Venture between eeef and Sinloc. The JV will enable a portfolio of energy efficiency projects on public facilities in the healthcare and education sectors in Italy. Primary energy and carbon savings are expected to improve by half as an average the energy performance of those facilities and will globally embrace all set of measures in the energy efficiency space for smart buildings, spanning for instance from the state of the art of heating and cooling generators and distribution systems, to LEDs, to insulation, to building automation.</p>	
Recent developments	
<ul style="list-style-type: none"> Sinloc and eeef have subscribed the Investment Agreement and are looking into the first project to onboard. Activities got started to further build the pipeline.

Advancing Sustainable Energy for Europe

Quarterly Fact Sheet as of 31/12/2019

eeef Technical Assistance development

The Technical Assistance (TA) Facility of the Fund, which has also received ELENA funding under the Horizon 2020 Programme of the European Union, was launched at the end of 2016. The objective is to support public authorities to prepare investment programmes for a sustainable transformation in the areas of energy efficiency and small scale renewable energy. eeef has selected a pool of consultants to work close to the public authorities during all the preparatory phases, from feasibility studies to energy audits to assistance in the public tender processes. So far, six public beneficiaries have been selected across Spain, Italy and Lithuania: a) City of Gijón (Spain), b) Ferrara Province – via SIPRO (Italy), c) Italian Ministry of Defense – Modena Ducal Palace (Italy), d) Kaunas Dis-

trict Municipal Administration (Lithuania), e) Autonomous Province of Bolzano (Italy) and f) Ukmerge District Municipality (Lithuania).

Additionally, the eeef has received further applications from public authorities in Lithuania, which required enlarging the advisory teams. To do so, in November 2019 the eeef published a call for proposals, on the Fund's website as well as on the European public procurement journal, to search for consultants who can assess potential projects in the country. The application process has been closed on 4th December 2019 and the eeef expects to achieve contractual closing for the new TA projects in the next months.

Project: City of Gijón 	Country: Spain Sector: Energy Efficiency Total investment volume (€ m): 15 to 19, depending on the final project scope TA amount approved (€): 400,000 eeef TA agreement close: 24 April 2017
General description	
City of Gijón is planning the implementation of an ambitious sustainable investment programme, comprising energy audits of 98 public buildings and 40,000 street lighting points and identifying the appropriate set of energy efficiency and/or renewable energy related interventions. The following preparation and publication of the call for tender will result in selecting preferably an ESCO company to realise the measures within a two-year timeframe. As a Covenant of Mayor and RECI member – the Spanish Association for Smart Cities –, Gijón is fully committed to share its experience and best practices with other public authorities, thereby boosting the replication potential for such type of projects in Spain but also Europe-wide.	
Recent developments	
<ul style="list-style-type: none"> • TA work has been completed and tender documents finalised. • Spain went through local elections in May 2019. • The new Government is discussing internally the time point to publish the tender, the market consultations are expected to be launched in March 2020. • Tender is envisaged to be published by Q2/2020 (eeef expectations). 	

Project: Ferrara Province – via SIPRO 	Country: Italy Sector: Energy Efficiency Total investment volume (€ m): 30.8 TA amount approved (€): 389,500 eeef TA agreement close: 31 May 2017
General description	
The Province of Ferrara joined forces with SIPRO Agenzia Provinciale per lo Sviluppo, a development agency with a 40-years track record, to prevent high energy consumption and losses going forward. The investment program addresses the implementation of energy efficiency measures in several municipalities, with deep energy retrofiting of 12 buildings such as schools, offices, town halls and sport facilities in Ferrara, Mesola and Cento and the replacement of 27,616 public lighting points to LED technology in Ferrara and Voghiera.	
Recent developments	
<ul style="list-style-type: none"> • The tender for Ferrara public lighting has been published and the contract awarded to an ESCO. • The tender for Mesola and Ferrara public buildings have been published. In Mesola, the service was awarded to an ESCO. • Ferrara public buildings did not receive any offers in respect to the first call and the Municipality has the intention to publish the tender again. Tender is expected to be published in Q2/2020. 	

Advancing Sustainable Energy for Europe

Quarterly Fact Sheet as of 31/12/2019

eef Technical Assistance development (continued)

<p>Project: Italian Ministry of Defense – Ducal Palace</p> 	<p>Country: Italy Sector: Energy Efficiency Total investment volume (€ m): 8.1 TA amount approved (€): 340,000 eef TA agreement close: 5 March 2018</p>
General description	
<p>The Ducal Palace in Modena (Italy) is owned by the Italian government and is currently used by the Italian Ministry of Defense (MoD). With a total project volume of € 8.1m, the upgrade of thermal systems (€ 5.0 m) is expected to include new pipes for the network distribution plus improvement of the existing ones, advanced climate control system, replacement of old radiators and boilers and retrofitting the hot water system. For the building envelope (€ 3.1 m), the MoD plans reducing thermal losses by introducing insulation in internal opaque walls and air infiltration with improved sealing of window frames. The Ducal Palace of Modena is located in the City of Modena, in the Italian region of Emilia Romagna. The palace was the residence of the Este Dukes of Modena for more than two centuries and today is owned by the Italian government. The main part of the building is currently used by the MoD and houses the headquarters of the Military Academy. In this building, military students attend academic lessons of several university courses held by professors from the public University of Modena and Reggio Emilia (UNIMORE). Part of the Eastern Tower of the palace houses the geophysical-meteorological observatory of UNIMORE, while the first floor is a public museum of the Military Academy with guided tours offered by the Municipality of Modena.</p>	
Recent developments	
<ul style="list-style-type: none"> • TA work has been completed and tender documents finalised. • Tender documents are been reviewed again by the TA beneficiary due to a change of the administration/staff. • Tender is expected to be published in Q1/2020. 	
<p>Project: Kaunas District Municipality Administration</p> 	<p>Country: Lithuania Sector: Energy Efficiency Total investment volume (€ m): 5.1 TA amount approved (€): 180,000 eef TA agreement close: 27 December 2018</p>
General description	
<p>On December 27th 2018, the eef signed a new TA Agreement with the Kaunas District Municipality Administration of the Republic of Lithuania, to help them to prepare and implement an ambitious investment programme for street lighting upgrade, covering audits, technical and financial studies and assistance in the tender process. The Kaunas District Municipality surrounds the Kaunas City Municipality, the second-largest city in Lithuania, and is one of the biggest and most densely inhabited municipalities of the country, including 3 cities, 9 towns and 371 villages. According to the pre-feasibility assessment, the total investment needed from the project ranges between € 5 m and € 10 m depending on the programme scope chosen, including LED installation on approx. 10.000 lighting points. The full implementation of the investment programme will achieve at least 1.76 GWh per year in primary energy savings.</p>	
Recent developments	
<ul style="list-style-type: none"> • Draft of tender documents has been completed, which included both technical and administrative specifications and the evaluation matrix to guide the Municipality through the selection process of ESCOs. • Tender documents are being evaluated by the Municipality and the CPMA. • Tender is expected to be published by Q1/2020. 	

Advancing Sustainable Energy for Europe

Quarterly Fact Sheet as of 31/12/2019

eeef Technical Assistance development (continued)

Project: Autonomous Province of Bolzano 	Country: Italy Sector: Energy Efficiency Total investment volume (€ m): 42 TA amount approved (€): 400,000 eeef TA agreement close: 13 June 2019
General description	
<p>The eeef signed the Technical Assistance Agreement to renovate 27 public buildings in Autonomous Province of Bolzano, Italy, in June 2019. The buildings owned by the province are expected to consume less energy in the near future, thanks to planned investments of around € 42 m in total. Once the studies and audits will be complete, the second phase of the project will begin, with the selection of the relevant companies for the renovation and management works. The first tender is planned to be published by 2020.</p>	
Recent developments	
<ul style="list-style-type: none"> • Verification and review of all energy audits have been finalised. • Initial assessment of detailed and simplified methods for performance calculation already started. • Analysis of the risk matrix already started, as well as the evaluation of financial and management tools. • Technical and economic analysis of reference buildings is ongoing. • Tender is expected to be published by Q3/2020 	
Project: Ukmergė District Municipality Administration 	Country: Lithuania Sector: Energy Efficiency Total investment volume (€ m): 5.1 TA amount approved (€): 160,000 eeef TA agreement close: 09 September 2019
General description	
<p>Ukmergė District Municipality is a municipality situated in Vilnius County, Lithuania. The capital of the municipality is Ukmergė and is the largest settlement in the municipality. In September 2019, the eeef signed a TA Agreement with Ukmergė District Municipality Administration, to help them preparing and implementing an investment program for the renovation of five municipal public buildings: Ukmergė Dukstynos Primary School, Ukmergė District Taujenai Gymnasium, Ukmergė District Vidiskes Basic School, Ukmergė children's nursery "Eglutė" and the Ukmergė Uzupis Primary School. The aim is to improve the buildings energy efficiency and ensure that they meet the national energy performance requirements, to facilitate a positive contribution to the national strategic objectives in energy efficiency. A preliminary assessment identified that the five buildings would require an investment volume of around € 5 m. The TA services, provided by experienced local consultants, will support the efforts of the Administration's employees to prepare the investment project. Supported services include the preparation of energy audits, the evaluation of the economic viability of each investment and structuring the tender documents to align with the PPP / ESCO model.</p>	
Recent developments	
<ul style="list-style-type: none"> • A consortium of legal, technical and financial firms has been selected by eeef to deliver the TA consultancy services. • TA work and technical analysis started. • Performance of energy audits has been completed. • The financial analysis of the investment project already started, including the evaluation of calculations and the project implementation alternatives. • Tender is expected to be published by Q3/2020.
